# Anup Timsina

#### AI/ML Enthusiast

Damak-06, Jhapa, Nepal • +977 9825988006 • timsinaanup23@gmail.com

Dedicated Data Analyst with a passion for Artificial Intelligence and Machine Learning. Experienced in delivering coding training sessions to enhance programming skills in students.

#### **EXPERIENCE**

## Data Management and Analysis

Remote

Pallon (AI Powered Swiss Company)

Sep, 2023 - Present

- Handling Datasets for Sewer System Management from various location over the world
- Conducting weekly meetings for smooth collaboration with team members
- Managing Data Quality for better outcome of ML models.

Coding Trainer Remote

Skilltootr Jun, 2023 - Present

- Conduct virtual training sessions on programming concepts.
- Focus on both theory and practical applications.
- Upskill students to enhance their programming skills.

#### **EDUCATION**

## Bachelors in Information Technology - 3.6 CGPA

Kathmandu

Texas College of Management and IT

Nov, 2019 - Sep, 2023

Intermediate (Specialization: Computer Engineering) - 2.85 CGPA

Damak

Himalaya Secondary School

Jun, 2017 - Jun, 2019

SEE (Computer Vocational) - 3.40 GPA

Damak

Himalaya Secondary School

Apr, 2016 - Apr, 2017

#### **PROJECTS**

#### NepalStockAnalyzer (Ongoing Personal Project)

- A comprehensive tool designed to simplify stock selection for investors.
- Leveraging web scraping, data analysis, and machine learning techniques to provide actionable insights.

https://github.com/timsinaanup/NepalStockAnalyzer

#### Sales Data Analysis

- Merged and cleaned 12 months of sales data, handling missing values and ensuring data consistency.
- Identified sales trends, top-performing months, and cities, using Python (Pandas, Matplotlib) for data aggregation and visualization.
- Analyzed peak sales hours and product combinations to optimize marketing strategies and product placements.

https://github.com/timsinaanup/Sales-Data-Analysis

### US Stock Analysis(Group Project)

- Used yfinance(yahoo-finance) package for real-time data extraction
- Extracted 2min and 5min data-change of different US stocks to analyze patterns
- Calculated the latest change for analyzation and further strategies
- Evaluating stock behaviors by finding SMA20 and SMA200

https://github.com/timsinaanup/US-Stock-Analysis

## Importable Realtime NEPSE Package

A small project available as a package to use anytime for anyone interested.

- Provides Realtime data in less than a second of timeframe
- Helps to look over preferable stocks
- Can work with single or multiple stocks at a same time.

Available at PyPI: NepseData · PyPI

https://github.com/timsinaanup/Package\_NepseData

## TRAINING/CERTIFICATIONS

# Data Analysis with Python 2023

Free Code Camp

freecodecamp.org/certification/timsinaanup/data-analysis-with-python-v7

## Google IT Automation with Python 2020

Coursera

https://www.coursera.org/verify/professional-cert/SLEZZYDDYLX8

### AI For Everyone 2020

Coursera

https://coursera.org/verify/MDBSGTQZPWPS

#### **SKILLS**

Artificial intelligence and Machine learning, Programming Language (Python, JavaScript, HTML, CSS), Requests, BS4, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Database Management: PostgreSQL, SQLite, SQLalchemy, Data Structures and Algorithm, Decision making skill, Time Management skill, Problem Solving, Flexibility,, Good interpersonal and communication skills with leadership quality, Project and team management

#### LANGUAGE

Nepali, English, Hindi
